STUDENT PLEDGE OF ACADEMIC INTEGRITY

As a student of Universiti Teknologi MARA (UiTM), it is my responsibility to act in accordance with UiTM's academic assessment and evaluation policy. I hereby pledge to act and uphold academic integrity and pursue scholarly activities in UiTM with honesty and responsible manner. I will not engage or tolerate acts of academic dishonesty, academic misconduct, or academic fraud including but not limited to:

- a. **Cheating:** Using or attempt to use any unauthorized device, assistance, sources, practice or materials while completing academic assessments. This include but not limited to copying from another, allowing others to copy, unauthorized collaboration on an assignment or open book tests, or engaging in any act or conduct that can be construed as cheating.
- b. **Plagiarism:** Using or attempts to use the work of others (ideas, design, words, art, music, etc.) without acknowledging the source; using or purchasing materials prepared by another person or agency or engaging in other behavior that a reasonable person would consider as plagiarism.
- c. **Fabrication:** Falsifying data, information, or citations in any academic assessment and evaluation.
- d. **Deception:** Providing false information with intend to deceive an instructor concerning any academic assessment and evaluation.
- e. **Furnishing false information:** Providing false information or false representation to any UiTM official, instructor, or office.

With this pledge, I am fully aware that I am obliged to conduct myself with utmost honesty and integrity. I fully understand that a disciplinary action can be taken against me if I, in any manner, violate this pledge.

Name: HAFIZ DANIAL BIN HAMIZI

Matric Number: 2023890306

Course Code: IML208

Programme code: CDIM 144

Faculty / Campus : COLLEGE OF COMPUTING, INFORMATICS AND MATHEMATICS

*Students are required to sign one pledge for each course taken.

Bahagian Pentaksiran dan Penilaian Akademik 2021

ACKNOWLEDGEMENT

Assalamualaikum,

First of all, alhamdulillah, I would like to thank Almighty God for giving me the strength to finishing the assignment. His endurance, guidance and protection that He has bestowed upon me during finishing this assignment.

I also want to convey my gratitude to Sir Mohd Firdaus Bin Mohd Helmi, my lecturer for his guide, his continuous helps, his motivation and his knowledge. His attention throughout this assignment helped a lot.

Moreover, I want to thank my family for infinite supports and helping me to keeps going. Their loves and encouragement words and actions really helps me a lot on finishing this assignment.

Last but not least, I would like to thank my classmates for helping me a lot throughout this assignment without any hesitation. I really appreciate their effort and making times for answering my questions.

5.0 GUI	2
6.0 RESULT	3
7.0 STRENGHT AND KAIZEN	5

1.0 PROJECT

Project name: Wedding Planner System

File name: WeddingPlannerSystem.py

2.0 PROMPT DATA:

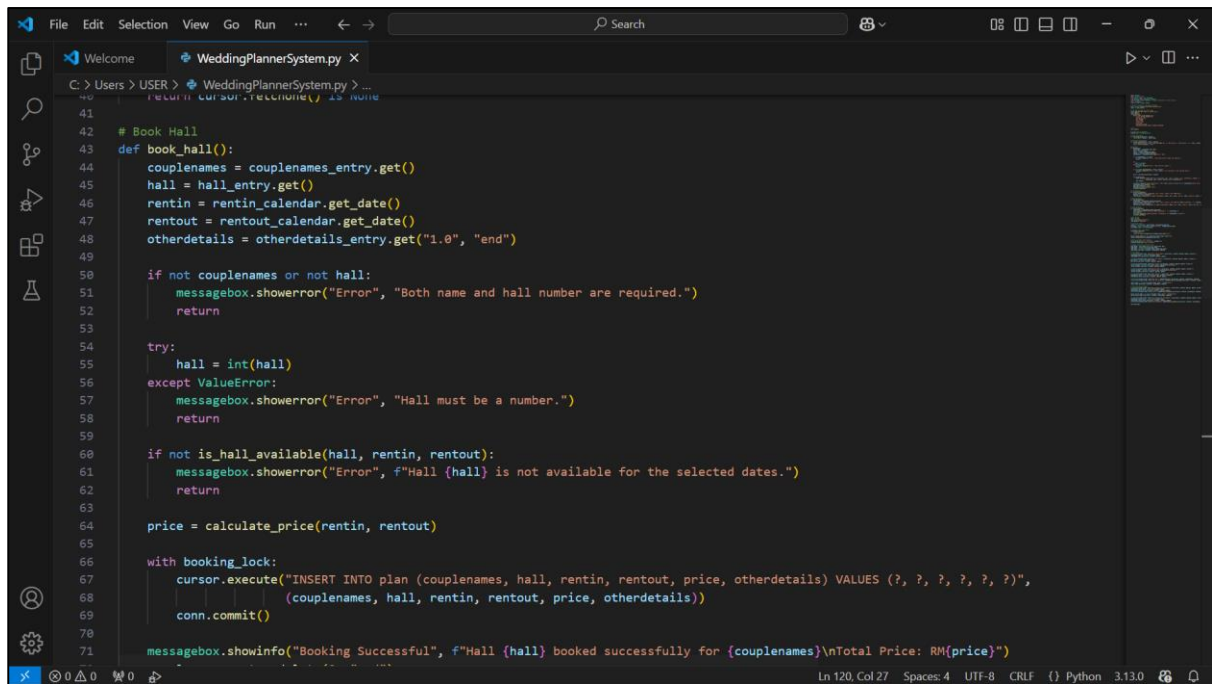

- i. Couple Names
Both names of the users who wants to use the system.
- ii. Hall Number
Number of the hall that wants to be book.
- iii. Rent-in and Rent-out dates
The date of when the hall going to be rent in and out.
- iv. Other Details
Details of the wedding ceremony. It could be anything such as guests counts, cakes, performances, and more.

3.0 FUNCTION:

- i. Create Data
Create the information by key in every data needed to use the services of the system.
- ii. Read Data
A function to viewing again the information created and entered to the system.
- iii. Update Data
Change the data entered to the system to make sure the accuracy is correct.
- iv. Delete Data
Remove the data from the system when the services of the system are not needed anymore.

4.0 CONDITIONAL STATEMENT:

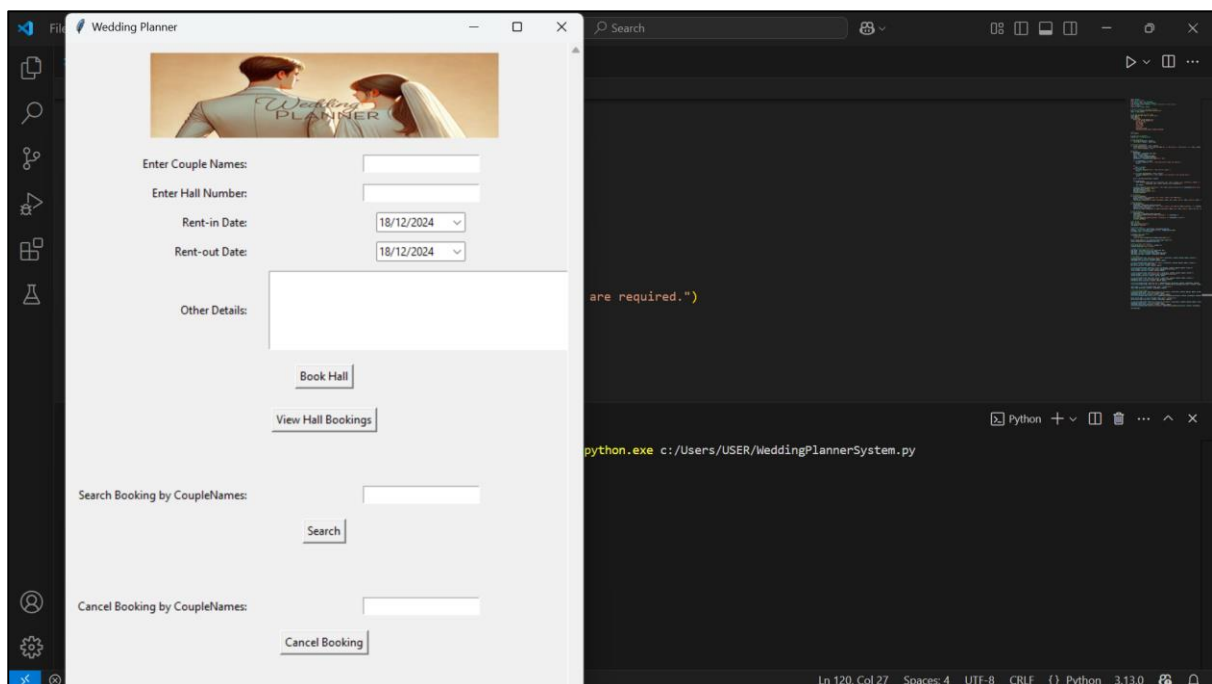

Yes, conditional statement is included.

```
41 return cursor.fetchone() as row
42
43 # Book Hall
44 def book_hall():
45     couplenames = couplenames_entry.get()
46     hall = hall_entry.get()
47     rentin = rentin_calendar.get_date()
48     rentout = rentout_calendar.get_date()
49     otherdetails = otherdetails_entry.get("1.0", "end")
50
51     if not couplenames or not hall:
52         messagebox.showerror("Error", "Both name and hall number are required.")
53         return
54
55     try:
56         hall = int(hall)
57     except ValueError:
58         messagebox.showerror("Error", "Hall must be a number.")
59         return
60
61     if not is_hall_available(hall, rentin, rentout):
62         messagebox.showerror("Error", f"Hall {hall} is not available for the selected dates.")
63         return
64
65     price = calculate_price(rentin, rentout)
66
67     with booking_lock:
68         cursor.execute("INSERT INTO plan (couplenames, hall, rentin, rentout, price, otherdetails) VALUES (?, ?, ?, ?, ?, ?)",
69                         (couplenames, hall, rentin, rentout, price, otherdetails))
70         conn.commit()
71
72     messagebox.showinfo("Booking Successful", f"Hall {hall} booked successfully for {couplenames}\nTotal Price: RM{price}")
```

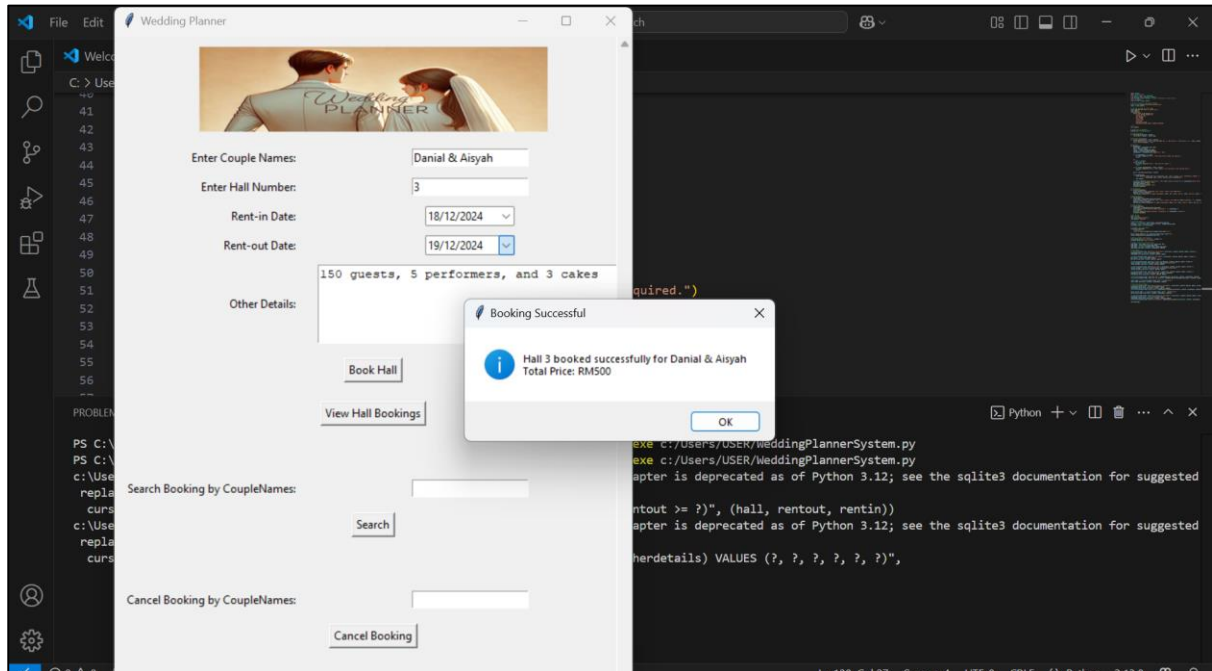

5.0 GUI:

Yes, GUI is created

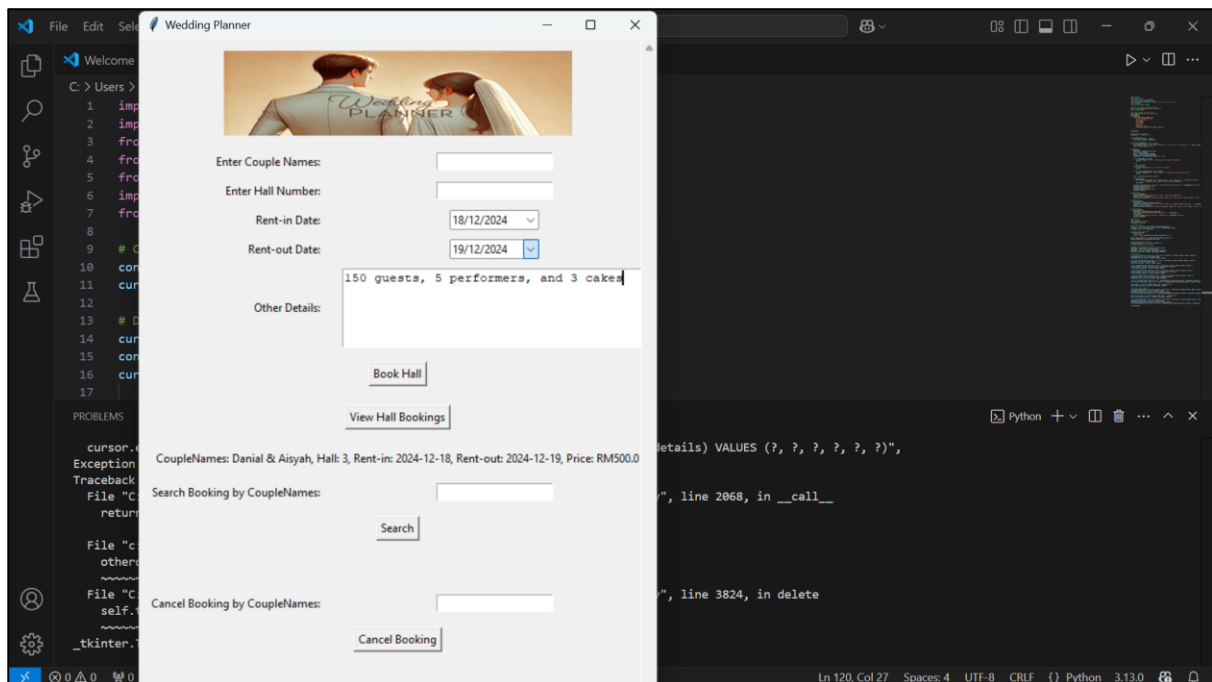

6.0 RESULT

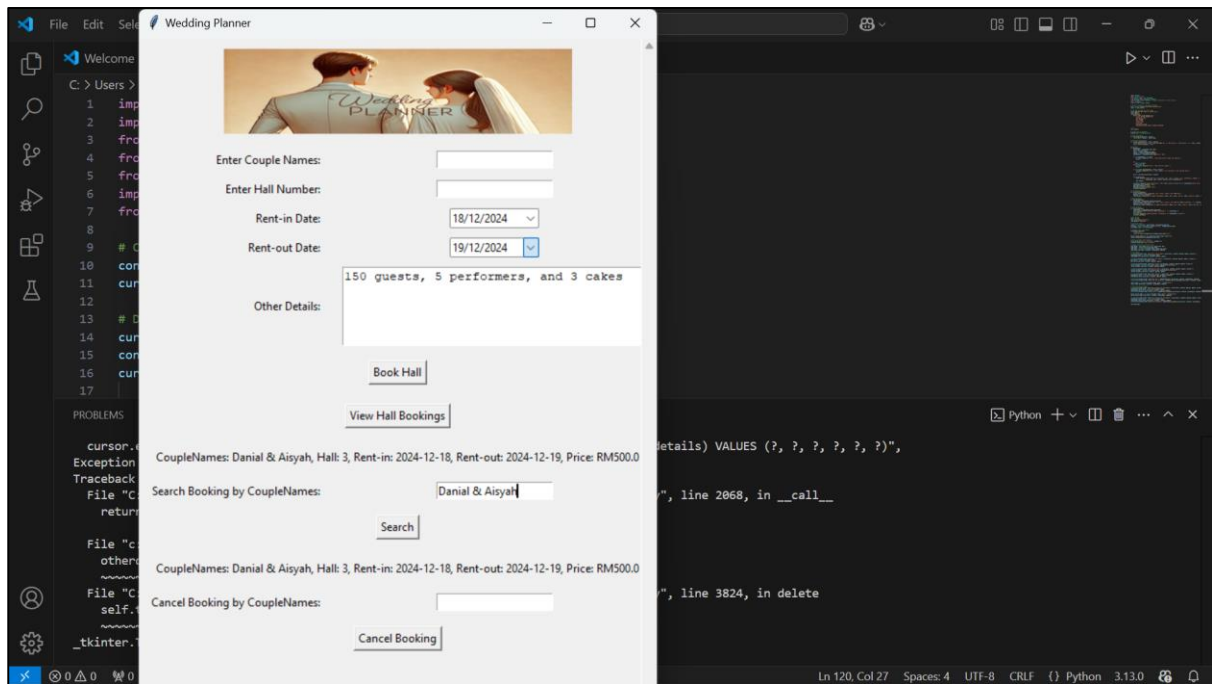

1. Result after entering the couple names, hall number, dates of renting, and other details about the wedding ceremony:

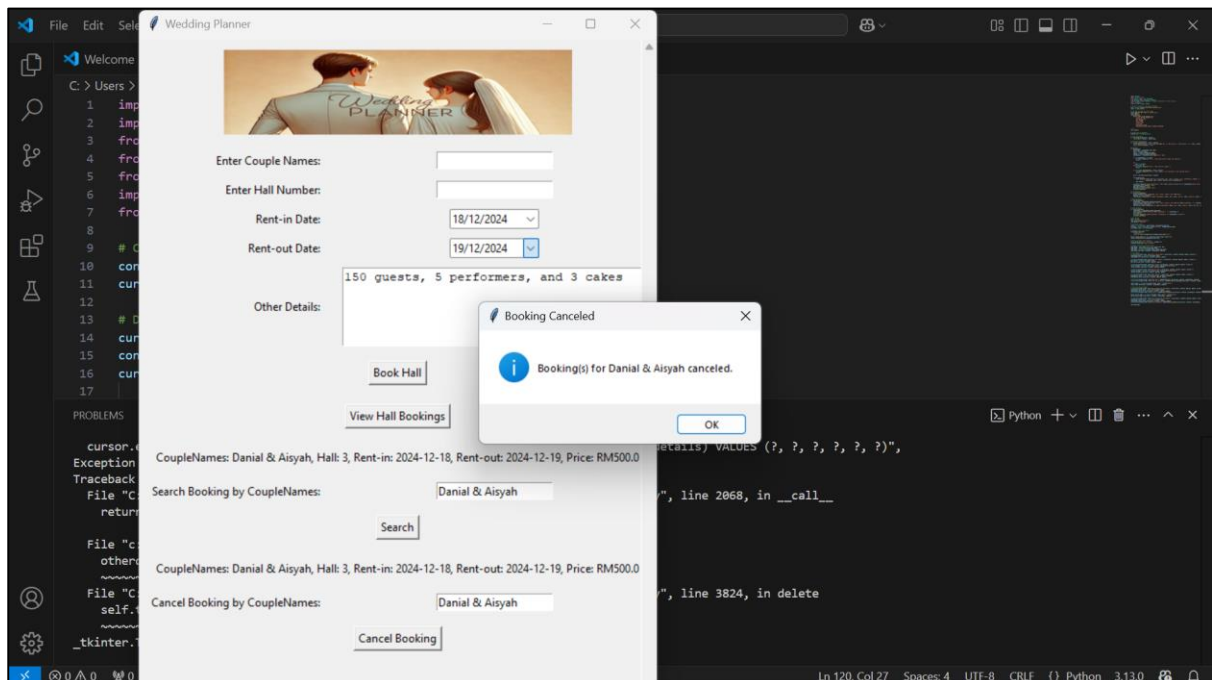

2. Result after view again the data:

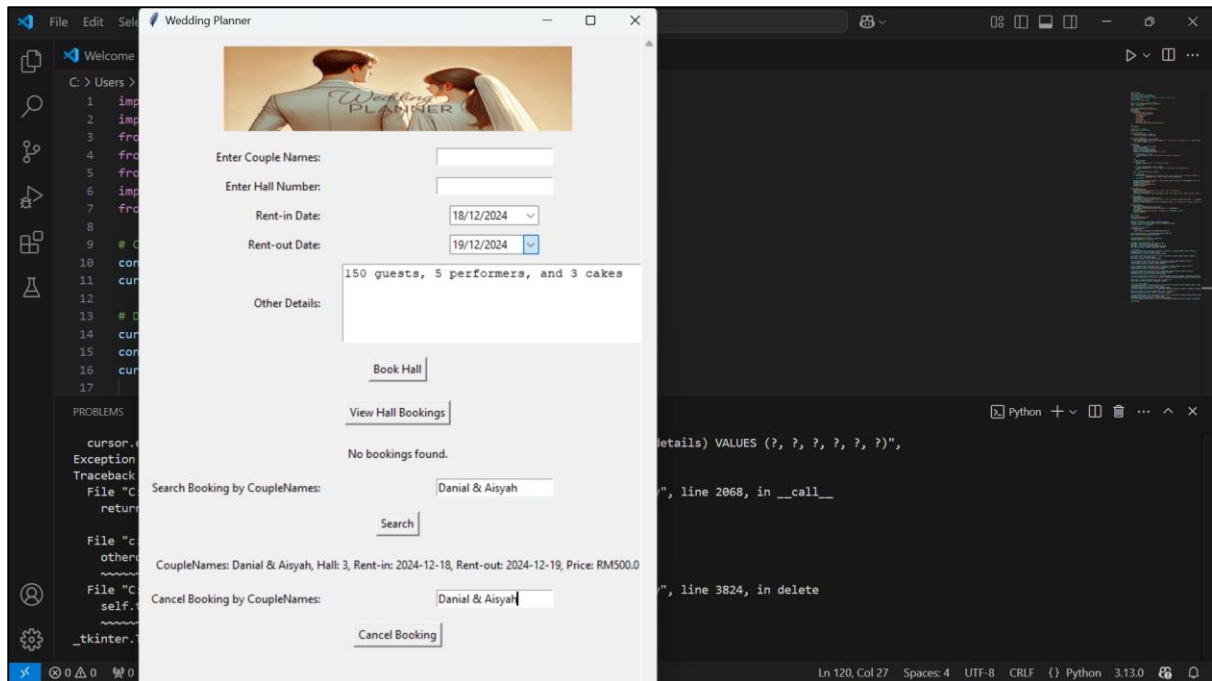

3. Result after searched the entered data:

4. Result after cancelled the services of the system:

7.0 STRENGTH AND KAIZEN

1. Strength

- Booking easily without having to move from places to places
- Save the time and energy
- Only needed information should be entered to avoid oversharing
- The price of the booked hall is accurate and avoid being scammed
- Able to enter the details needed of the wedding ceremony to make sure it can be additions to the hall

2. Kaizen

- Generate more creative background for the interface to attracts user
- Create an user-friendly interface to avoid any struggles while using the system
- Include a lot more of interface and not just focusing only on one page
- Send the notification after booked and paid for example receipts through email, auto created messages or downloadable files
- Add a chat assistant to help the users of the system when using the services to avoid misunderstandings and entered the wrong data and information details
